1 [A survey and analysis of Electronic Healthcare Record standards](#)

 Marco Eichelberg, Thomas Aden, Jörg Riesmeier, Asuman Dogac, Gokce B. Laleci
 December 2005 **ACM Computing Surveys (CSUR)**, Volume 37 Issue 4

Publisher: ACM Press

 Full text available: pdf(844.11 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Medical information systems today store clinical information about patients in all kinds of proprietary formats. To address the resulting interoperability problems, several Electronic Healthcare Record standards that structure the clinical content for the purpose of exchange are currently under development. In this article, we present a survey of the most relevant Electronic Healthcare Record standards, examine the level of interoperability they provide, and assess their functionality in terms o ...

2 [Making use of document standards and models: A framework for structure, layout & function in documents](#)

John Lumley, Roger Gimson, Owen Rees

 November 2005 **Proceedings of the 2005 ACM symposium on Document engineering DocEng '05**

Publisher: ACM Press

 Full text available: pdf(1.55 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Document Description Framework (DDF) is a representation for variable-data documents. It supports very high flexibility in the type and extent of variation supported, considerably beyond the 'copy-hole' or flow-based mechanisms of existing formats and tools. DDF is based on holding application data, logical data structure and presentation as well as constructional 'programs' together within a single document. DDF documents can be merged with other documents, bound to variable values incrementally ...

1 [Coordination models, languages and applications: Editorial message: special track](#)

[on coordination models, languages and applications](#)

Andrea Omicini, Sascha Ossowski

March 2002 **Proceedings of the 2002 ACM symposium on Applied computing**

Publisher: ACM Press

Full text available: [pdf\(136.89 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The notion of *coordination* is more and more pervading many research fields both inside and outside Computer Science. Many research areas such as software engineering, intelligent systems, agent technologies, Internet applications, programming languages, parallel and distributed computing, all raise issues that concern the *interaction* among different sorts of entities --- processes, objects, components, agents --- as well as its management. Despite their apparent diversity, this wid ...

2 [BPMS: business process management systems](#)

[Dimitris Karagiannis](#)

August 1995 **ACM SIGOIS Bulletin**, Volume 16 Issue 1

Publisher: ACM Press

Full text available: [pdf\(363.98 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

In the last years a lot of research has been done in different domains concerning information system applications. Recent research is characterized by the effort of applying information systems to heterogeneous and distributed environments. Information systems dealing with the definition, administration, customization and evaluation of tasks evolving from business processes as well as from organizational structures are called Business Process Management Systems (BPMS). Recognizing the need of suc ...

3 [Ontologies: A pragmatic application of the semantic web using SemTalk](#)

[Christian Fillies, Gay Wood-Albrecht, Frauke Weichardt](#)

May 2002 **Proceedings of the 11th international conference on World Wide Web**

Publisher: ACM Press

Full text available: [pdf\(368.90 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

There is a new layer of the Internet that enables semantic representation of the contents of existing web pages. Using common ontologies, human users sketch out the most important facts in models that act as intelligent whiteboards. Once models are
